

ASX and Media Release

Grant of borefield tenure paves way for imminent approval of MARP

WPG Resources Limited (ASX:WPG) is pleased to advise that PIRSA, the South Australian mining regulator, has approved the miscellaneous purposes licence applications that the Company lodged in the December 2010 quarter for the Stafford borefield at Hawks Nest and the Penrhyn borefield near Wirrida. MPLs 133 and 134 were granted yesterday. The MPLs are valid for the full term of the Peculiar Knob mining lease.

These MPLs cover the production and monitoring bores at the two borefields, all pumping and associated infrastructure, and the pipelines that will be used to carry water to where it is needed for the mining operation.

Each of the borefields can deliver sufficient water for the Peculiar Knob mining project. Consequently, there is ample spare water capacity available to the Company to cover all reasonable contingencies and potential future expansion opportunities.

The two borefields have been licensed for production by the water regulator, the Department for Water.

As previously advised, WPG expects that the Mining and Rehabilitation Program (MARP) for Peculiar Knob will be approved during July 2011.
